#### VI. LOCAL, STATE, AND FEDERAL REGULATORY PERMITS

COPIES OF ALL GOVERNMENT REGULATORY PERMITS ARE REQUIRED BEFORE ISSUANCE OF A DNR USE AUTHORIZATION. YOUR PROJECT MAY REQUIRE SOME OR ALL OF THESE PERMITS.

Please include the following permit applications, permits, or waivers with the application:

##### JARPA (Joint Aquatic Resource Permit Application)

This one form is used to apply for all of the following individual permits:

1. Section 10 Permit (Required by the US Army Corps of Engineers for any work in or affecting navigable waters, e.g., floats, docks, piers, dredging, pilings, bridges, overhead power lines.)
2. Shoreline Substantial Development, Conditional Use, Variance Permit or Exemption (Issued by Local Government, and is required for work or activity in the 100 year floodplain, or within 200 feet of the Ordinary High Water mark of certain waters; and which included any one of the following: dumping, drilling, dredging, filling, placement or alteration of structures or any activity which substantially interferes with normal public use of the waters.)
3. Hydraulic Project Approval (Required by the Department of Fish and Wildlife if the project includes work that will use, divert, obstruct, or change the natural flow or bed of any fresh or salt water of the state.)
4. Section 404 Permit (Required by the US Army Corps of Engineers if your project will discharge or excavate any dredged or fill material waterward of the Ordinary High Water mark or the Mean Higher High Tide Line in tidal areas.)
5. Section 401 Water Quality Certification (Required by the Department of Ecology if a Section 404 permit is required)

##### NPDES (National Pollutant Discharge Elimination System Permit)

Required by the Department of Ecology under delegated authority from the Federal Environmental Protection Agency for projects that include the discharge of fluid on or into surface water.

##### SEPA (State Environmental Policy Act) Checklist and Environmental Assessments

When you submit a permit application to any agency, if the project is not exempt, the lead agency will ask you to fill out an environmental checklist. Based on checklist answers and the reviewers knowledge of the project site, agency personnel will determine the types of impacts the project may have on the environment. The agency assessments may be the following forms: Determination of Nonsignificance, Determination of significance, scoping documents, draft or final Environmental Impact Statements (EIS) or others prepared for the purpose of compliance.

Describe any habitat mitigation required by any of the permitting agencies identified above and identify where such mitigation is proposed to occur: NA

#### VII. PROPERTY SURVEY

A survey of the area to be leased is required for each application (except material removal and mooring buoys). A third order survey is required and a Record of Survey plat shall be submitted showing the results of the survey and the location of the lease site applied for. A copy of the final proposed plat must be submitted directly to the land manager who will pass onto the department's Engineering Division, State Land Survey Unit, for preliminary review prior to submission of the final plat. The final plat shall be filed with the county auditor and a copy that includes the auditor's recording information shall be submitted to the department's Aquatic Resources Division.

THE AUTHORIZATION TO USE AQUATIC LANDS IS OFTEN SUBJECT TO PREFERENCE RIGHTS. APPLICANTS AND SURVEYORS SHOULD CAREFULLY DETERMINE THE DIRECTION, AND SHOW DETAIL OF, THE PROXIMATION OF COVER AND IRREGULAR SHORELINES.

Specific requirements are:

1. The location of the proposed project area should be surveyed and become a part of the application. This survey should comply with the standards set forth in WAC 332-130-090 as required and a Record of Survey plat shall be submitted showing

the results of the survey and the location of the aquatic lease site applied for. A copy of the final proposed plat must be submitted directly to the land manager who will pass it on to the department's Engineering Division, State Land Survey unit, for preliminary review prior to submission of the final plat. The final plat shall be filed with the county auditor and a copy that includes the auditor's recording information shall be submitted to the department's Aquatic Resources Division.

2. The plat must be certified to be accurate, signed and sealed by a Washington State registered land surveyor (RCW 18.43.070), or a public official as prescribed by law.
  3. All field boundary surveys and plat preparation (actual map) shall be performed according to the standards prescribed in WAC 332-130 and Title 58 RCW.
  4. Distances and directions to the lease area from two or more controlling corners of a recorded subdivision or government survey (GLO) corners must be provided.
  5. The survey shall be related by meridian and coordinate to the Washington Coordinate System by closed ties to NGS Control monuments, or the extension thereof. The designation of the control stations used shall appear on the plat.
  6. The plat must show the location of the following lines for:
    - (a) Tidal Areas - Government meander line, line of mean high tide, line of mean low tide, and line of extreme low tide (include name of tidal bench mark(s) used for tidal datum);
    - (b) Lakes - Government meander line, line of ordinary high water (original ordinary high water if area has experienced artificial raising or lowering of water level), and line of ordinary low water (include source of data) and line of navigability if established;
    - (c) Rivers - Line of ordinary high water and line of ordinary low water (include source of data) and line of navigability if established.
  7. Where existing, the plat must show location of lots and blocks of platted tide or shore lands, inner and outer harbor lines, waterway lines, street boundaries, and any local construction limit lines.
  8. Proposed lease area boundaries must be clearly shown with distances and directions of all boundary lines. The area of the lease shall be shown to an accuracy of (+/-) 0.5% of the total area or (+/-) 10 square feet, whichever is greater.
  9. A narrative legal description must describe the actual area being proposed to lease. It must be prepared, signed, and stamped by a licensed land surveyor, and attached to Exhibit A.
  10. The exhibit map must show a detailed plan of improvements to be constructed or already existing on the lease area, such as piers, wharves, bulkheads, breakwaters, dolphins, buoys, or other structures.
  11. No facility shall be constructed such that any portion of it falls outside the granted lease site.
  12. A photo-reduced 11 inch by 17 inch copy of the plat marked as Exhibit "A" shall be submitted with the final plat.
- Note:
1. The lease of aquatic lands is often subject to preference rights. Applicants and surveyors should carefully determine the direction, and show detail of, the promotion of coves and irregular shorelines.
  2. VARIANCE - When connection to the Washington Coordinate System would require an extensive control survey, the applicant may submit a request for a variance from that requirement to the division's land manager. The request shall clearly state the reasons for the variance, propose an alternate meridian, and be signed by a land surveyor licensed in Washington.

All answers and statements are true and correct to the best of my knowledge.
